

MAPA CORPORATE OPERATING SYSTEM

IMS NAVIGATION MAP

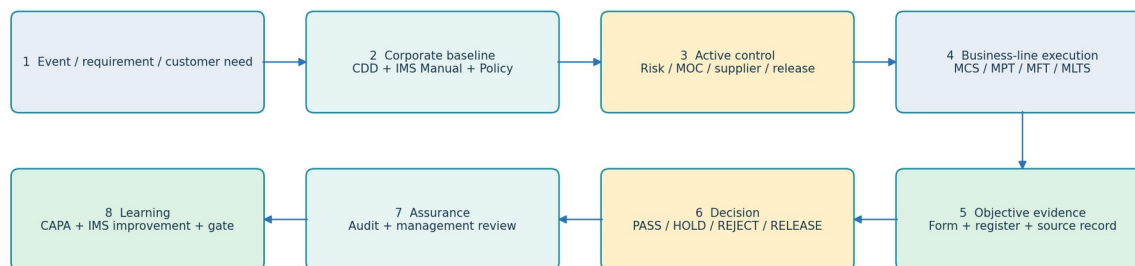

How to enter, operate, evidence and close work inside MCOS

Document code	MAPA-IMS-NAV-001
Gate / package	GATE-001 / Package-001 READ FIRST
Version / issue	1.0 / 08 August 2026
Owner	QA/QC & IMS Manager
Applicability	SARL MAPA ALGÉRIE; MCS, MPT, MFT and MLTS
Status	Controlled Issue - GM activation approval required

READ FIRST Use this map before opening a procedure or form. Start with the business event, identify the governing control path, create the required record, obtain the decision and preserve retrievable evidence.

1. Primary Navigation Route

MCOS integrated operating route

Rule: no gate PASS without contemporaneous, attributable and retrievable evidence.

Figure 1 - End-to-end MCOS navigation route used by GATE-001.

2. Controlled Document Layers

Layer	Purpose	Controlled examples	User question
L1	Corporate direction	MAPA-CDD-001; MAPA-CDD-002; MAPA-IMS-MAN-001; MAPA-IMS-POL-001	Scope, authority, operating principles
L2	Common control	MAPA-IMS-PRO-DOC / RSK / MOC / NCR / AUD / MR; MAPA-SCM-PRO-SUP; MAPA-QA-PRO-REL	Decision rules, ownership, escalation
L3	Execution	Applicable MCS, MPT, MFT or MLTS SOP / plan / method	Sequence, limits, accept-reject criteria

Layer	Purpose	Controlled examples	User question
L4	Evidence	Approved form, checklist, record, log, report and source attachment	Proof of action and decision
L5	Master data	Specification, recipe, method, role, equipment, supplier and code masters	Single valid reference value

3. Business-Line Entry Points

Code	Controlled name	Operational scope	Typical entry
MCS	MAPA Concrete Solutions	Chemical admixture production, factory QC, release and technical support	Production/batch event
MPT	MAPA Precast Technologies	Precast concrete manufacture, curing, lifting, storage and dispatch	Precast order / pour
MFT	MAPA Formwork Technologies	Steel, tunnel and special sheet-metal formwork engineering and manufacture	Formwork job / fabrication
MLTS	MAPA Laboratory & Technical Services	Commercial testing, experimental studies and technical reports	Contract / sample / method

4. Fixed Eight-Part Gate View

No.	Gate section	Navigation test
1	Operation	What actually happened and what output is required
2	IMS Engine	Which approved controls and records govern the event
3	Decision Architecture	Who decides, at what level, with which vetoes
4	Objective Evidence	What proves execution, review and status
5	Management Review	What management must review, resource or direct
6	Lessons Learned	What was learned from performance, event or deviation
7	IMS Improvement	What controlled change, CAPA or horizontal deployment follows
8	Gate Status	PASS / CONDITIONAL / HOLD / FAIL and closure basis

5. GATE-001 Applied Route

1. Open the event as INCIDENT-001; preserve the event identity and first-response evidence.
2. Apply immediate containment and maintain HOLD until the affected scope is known.
3. Route the case through MAPA-IMS-PRO-NCR; use the relevant technical branch for product, HSE/environment or IT/OT evidence.
4. Complete Major Investigation, disposition, recovery/reconciliation and CAPA decision records.

5. Verify the accepted recovery and remaining actions independently; do not treat recovery as CAPA effectiveness.
6. Record management review, lessons and IMS improvement; close GATE-001 only after retrieval confirms the evidence chain. Result: PASS.

6. Non-Negotiable Navigation Rules

- Blank templates, training examples and unsigned exports are not objective evidence.
- KRMIX is a product/family name only; it is never the legal, plant, laboratory or IMS identity.
- MCS Production QC Laboratory and MLTS Commercial Laboratory remain separate controlled functions.
- A business deadline cannot override HOLD, stop-work, OOS/NCR, test integrity or independent release authority.
- The current approved revision, linked source evidence and responsible owner must be identifiable at retrieval.

Revision History

Version	Date	Change	Authority / record
0.1	06.08.2026	GATE-001 simulation working content	Simulation baseline
0.9	07.08.2026	Gate closure; navigation and case route frozen	GATE-001 PASS
1.0	08.08.2026	Initial controlled Document Package issue	CN-2026-0001

Approval and Activation

Stage	Role	Decision condition	Status / date
Prepared	QA/QC & IMS Manager	Content and traceability complete	08.08.2026
Reviewed	Technical Director / Functional Owners	Controlled review required	Open
Approved	General Manager	Required before live operational activation	Pending
